

800-942-4447

Aquasilk Series

- Ultra-soft plastisol ink for cotton and poly/cotton blends.
- Great substitute for screen printing water-based ink
- Creamy, easy-to-print viscosity.
- Available in white and all of our standard colors.
- Very stretchable for printing cotton/lycra and cotton/spandex blends.

Who should use this ink?

Screen printers looking to replace water-based ink for printing on towels or soft tees should give Aquasilk inks a try.

Who should not use this ink?

Aquasilk is not formulated as a low bleed ink. If you are printing a lot of red or black poly/cotton tees, Aquasilk is not an ideal ink.

Flash Cure

240° – 260° F
4 – 6 seconds

Cure Temperature

320° F
60–90 seconds

Saatichem IR-4

Always perform a pretest print and test cure conditions on the fabric to be printed to establish the best results. Stir inks vigorously before each use. Viscosity may need adjusting for best results. If there is ever a question about a print job, call us at 1-800-942-4447. We are always happy to help!
