

800-942-4447

Foto Seps Series

- Simulated process ink for cotton and poly/cotton fabrics.
- Formulated for fine mesh and wet-on-wet screen printing.
- Standard and high opacity formulas available.
- Specific Pantone colors available for use with most industry software.
- Unlike process printing, the H.O. colors do not require underbase.

Who should use this ink?

If you are using any one of the most popular simulated process software programs, the Foto Seps inks were made for you.

Who should not use this ink?

Foto Seps inks are not meant for athletic screen printers as they do not have the bleed resistance required for 100% polyester.

Flash Cure

240° – 260° F
4 – 6 seconds

Cure Temperature

320° F
60–90 seconds

Mesh Range

196 – 230
Monofilament

Available Colors

Pantone Colors
& White

Reducers

Curable Reducer
Reducer #2
Visco Minus

Clean-up

Saatichem PW-4
Saatichem IR-4

Always perform a pretest print and test cure conditions on the fabric to be printed to establish the best results. Stir inks vigorously before each use. Viscosity may need adjusting for best results. If there is ever a question about a print job, call us at 1-800-942-4447. We are always happy to help!
