

800-942-4447

## Hybrid Series

- Very opaque cotton and poly/cotton screen printing ink.
- Great bleed resistance for preventing dye migration.
- Softer hand on tees and sweats than most other opaque inks.
- Hybrid White is our top general purpose white ink.
- Stretchable enough for cotton/lycra blends.

### Who should use this ink?

If you are tired of screen printing thick high opacity inks, the Hybrid Series was made for you. It is a softer, more printable opaque ink.

### Who should not use this ink?

Hybrid Series is not for screen printing on 100% polyester. For athletic printers, you would be better to try our Hybrid Poly White.

#### Flash Cure

240° – 260° F  
4 – 6 seconds

#### Cure Temperature

320° F  
60–90 seconds

Curable Reducer  
Athletic Reducer  
Visco Minus

#### Clean-up

Saatichem PW-4  
Saatichem IR-4

Always perform a pretest print and test cure conditions on the fabric to be printed to establish the best results. Stir inks vigorously before each use. Viscosity may need adjusting for best results. If there is ever a question about a print job, call us at 1-800-942-4447. We are always happy to help!
