

Lumiflect

- Our most reflective ink for printing cotton and poly/cotton fabric.
- Great for fashion reflective printing when certification is not required.
- Easy-to-print, one-part plastisol ink.
- Lumiflect prints through finer screen mesh than other reflectives.
- Do not print, flash, print or underbase with white.

Who should use this ink?

Screen printers looking for a stronger fashion reflective on tees and sweats, or those needing finer detail prints, will love how easy this ink is to print.

Who should not use this ink?

Lumiflect must wick into the fabric to work properly. Due to this factor, it is not a good ink for printing jackets, bags, and other nylon or polyester fabrics.

Flash Cure

240° – 260° F
4 – 6 seconds

Cure Temperature

320° F
60–90 seconds

Mesh Range

86 – 158
Monofilament

Available Colors

Lumiflect
Lumiflect Silver
Lumiflect Dark Gray

Reducers

Curable Reducer
Reducer #2
Visco Minus

Clean-up

Saatichem PW-4
Saatichem IR-4

Always perform a pretest print and test cure conditions on the fabric to be printed to establish the best results. Stir inks vigorously before each use. Viscosity may need adjusting for best results. If there is ever a question about a print job, call us at 1-800-942-4447. We are always happy to help!
