

Versamax White

Description

Are you ready for a white ink that will print virtually any garment in your shop? If so, the Versamax White will provide excellent coverage and bleed resistance for printing T's, sweats, uniforms, stretchables, and much more. There is no longer a need for stocking so many different inks for so many different fabrics. Versamax White has a matte finish and a soft hand.

Printable Fabrics

Light, medium, and dark 100% cotton, poly/cotton blends, 100% nylon, 100% polyester, spandex and lycra. Add 10% nylon catalyst for screen printing waterproof and water resistant materials.

Screen Mesh

86 to 230 monofilament screen mesh is recommended depending on the detail of the art work, color of the ink, and color of the garment.

Squeegees

60, 70, and 80 single durometer rubber is recommended for most applications.

Flash Time & Temperature

Flash for 3 to 5 seconds with a standard infrared unit. Excessive flash time or temperature is not recommended. This may cause dye migration or over-print adhesion difficulty.

Important Note

Always perform a pretest print and test cure conditions on the fabric to be printed to establish the best results. Stir inks vigorously before each use. Viscosity may need adjusting for best results. If there is ever a question about a print job, call us at 1-800-942-4447. We are always happy to help!

Curing

The entire ink film must reach 320 degrees Fahrenheit. Every conveyor dryer will operate differently due to the large number of variables. Under-cured garments will likely exhibit cracking or flaking after washing.

Reducers

All of the inks we manufacture are ready-to-print. If reducing is required, please add Curable Reducer, Visco Minus, or Athletic Reducer (5% maximum).

Cleaning

We distribute numerous cleaners for our plastisol inks. These cleaners include: PW4, IR4, Franmar Chemicals, Screen Wash, and Citrus Green.

Available Colors

A full selection of colors, white, and custom colors are available. Provide a Pantone number, ink swatch, or material sample for matching.
