

# d•Haze<sup>®</sup> Ghost Remover

*Environmentally Friendly • 100% Biodegradable • Non-Toxic and Non-Caustic*

---

Franmar's d•Haze<sup>®</sup> ghost remover is a non-caustic, non-toxic product that will not damage the mesh even after *years* of use. Environmentally friendly and drain safe, there is no longer a need to wear protective gear.

## **To Use:**

- 1. On a dry or slightly damp screen, spray d-Haze<sup>®</sup> on the ghost/haze image to be cleaned.**
- 2. Work in on both sides of the screen with a nylon brush or Franmar's Red Biggee pad.** *For tough to clean haze images, let sit for up to 2 minutes before cleaning.*
- 3. Spray clean with water or use a damp cloth to wipe off both sides of screen.**

- ✓ **Tip #1** Use each time immediately after stencil removal so ghost/haze will not set in the screen.
- ✓ **Tip #2** Control amount by using a spray bottle, avoiding frame edges as d-Haze will remove the glue holding the mesh to the frame.
- ✓ **Tip #3** Use Franmar's d•Grease<sup>™</sup> to remove any residue.
