

## ATHLETIC REDUCER

### TECHNICAL DATA SHEET

#### SHORT DESCRIPTION:

Formulated to reduce viscosity without harming adhesion to nylon substrates as conventional reducers will. It is also recommended for all One Stroke Inks high performance/low bleed inks.

#### ATHLETIC REDUCER BENEFITS:

- Quickly lowers ink viscosity.
- Formulated for use with our athletic inks such as 222 Series and Athletic Plus Series.
- Can be mixed in by hand, drill, or machine.

#### MIXING INSTRUCTIONS:

- Add up to 5% Reducer #2 by weight.
- Never exceed 10% as this may ruin the ink.

Important Note: Reducer #2 is not a curable product. If you add too much Reducer #2, you may experience durability problems as the ink will not properly cure.

Always perform a pretest print and test cure conditions on the fabric to be printed to establish the best results. Stir inks vigorously before each use. Viscosity may need adjusting for best results. If there is ever a question about a print job, call us at 800-942-4447. We are always happy to help!
