

TECHNICAL DATA SHEET

SHORT DESCRIPTION:

ELT Reducer is the best product for reducing/thinning ELT Series and ELT-S Series. Very little liquid is required to thin these inks so the ELT Reducer will not affect the cure temperature or time. The opacity and bleed resistance is only affected minimally when used properly.

ELT REDUCER BENEFITS:

- Improves printability of old ink.
- Allows for printing through very fine screen mesh.
- Can be mixed in by hand, drill, or machine.
- Works with ELT Series or ELT-S Series.

MIXING INSTRUCTIONS:

- Add 1-2% ELT Reducer by weight.
- 1 ounce to a full gallon is an excellent starting point.
- Never exceed 5% as this may ruin the ink.

Important Note: ELT Reducer is not a curable product. If you add too much ELT Reducer, you may experience durability problems as the ink will not properly cure.

Always perform a pretest print and test cure conditions on the fabric to be printed to establish the best results. Stir inks vigorously before each use. Viscosity may need adjusting for best results. If there is ever a question about a print job, call us at 800-942-4447. We are always happy to help!
