

STELLAR BLACK

TECHNICAL INFORMATION

SHORT DESCRIPTION

Venture beyond the limits of regular black ink. Stellar Black has infinite depth. Truly out of this world.

BENEFITS

- Designed for easy wet-on-wet printing.
- Will not build up on the back of the screen.
- Universal ink for printing all fabrics.
- Compatible with nylon catalyst for printing on waterproof nylon and polyester.

TIPS & TRICKS

- Try reducing your mesh count. The increased pigment load allows for a deeper black at higher mesh counts.
- Try this black with any of our other direct print series. This ink performs well at high and low temperatures.
- Try a hit-flash-hit for a glossy finish.

COMPLIANCE

All of the inks manufactured by One Stroke Inks are phthalate compliant and in accordance to Proposition 65. For more information or to download individual Safety Data Sheets visit <https://www.onestrokeinks.com/shopcompliance.asp>

110 to 230

INK CURING

250°F - 320°F

FLASH CURE

5/5: Exceptional

SQUEEGEE

70 Durometer

CLEAN UP

PW-4 or IR-26

ADDITIONAL INFORMATION

PRECAUTIONS

- These parameters have been set under lab conditions. We recommend doing a test run to account for variables we cannot control during our testing process.
- This ink contains PVC and should not be used with our PVC Free Series.

For best results, stir inks vigorously before each use. Adjust viscosity to your preference. Washing and drying your prints is the ultimate test of durability. Always preform a test run to check that cure conditions have been properly set. If you have further questions, contact us at 800-942-447. We are happy to help you!
